The Purpose of this By-Law and How it Should Be Used

Introduction

These pages explain the purpose of this zoning by-law and how it should be used. In addition, these pages also explain what happens if the By-law is not complied with, when the by-law comes into effect and discusses issues relating to non-conforming uses and non-complying buildings and structures.

These pages do not form part of the zoning by-law passed by Council and are intended only to make the zoning by-law more understandable and easier to reference.

Purpose of this Zoning By-Law

The purpose of this zoning by-law is to implement the policies of the Township of Oro-Medonte Official Plan. The Official Plan contains general policies that affect the use of land throughout the Township. These policies specify where certain land uses are permitted and, in some instances, specify what regulations are to apply to the development of certain lands.

The Official Plan is a general document that is not intended to regulate every aspect of the built-form on a private lot. In the Province of Ontario, this is the role of the zoning by-law. Once an Official Plan is in effect, any Zoning Bylaw passed by Council must conform to the Official Plan. For example, if the Official Plan stated that lands in the vicinity of a significant natural feature are to remain in their natural state, the zoning by-law would prohibit the erection of buildings or structures on those lands.

The statutory authority to zone land is granted by the Planning Act, R.S.O 1990 c P. 13. Section 34 of the Planning Act specifies what a by-law passed under this Section can regulate. A zoning by-law can:

- a) prohibit the use of land or buildings by any use that is not specifically permitted by the by-law;
- b) prohibit the erection or siting of buildings and structures on a lot except in locations permitted by the by-law;
- c) regulate the type of construction and the height, bulk, location, size, floor area, spacing, character and use of buildings or structures;
- d) regulate the minimum frontage and depth of a parcel of land;
- e) regulate the proportion of a lot that any building or structure may occupy;
- f) regulate the minimum elevation of doors, windows or other openings in buildings or structures or in any class or classes of buildings or structures;

- g) require the owners or occupants of buildings or structures to be erected or used for a purpose permitted by the by-law to provide and maintain loading or parking facilities; and,
- h) prohibit the use of lands and the erection of a class or classes of buildings or structures on land that is:
 - subject to flooding;
 - the site of steep slopes;
 - rocky, low-lying, marshy or unstable;
 - contaminated;
 - a sensitive groundwater recharge area or head water area;
 - the location of a sensitive aquifer;
 - a significant wildlife habitat area, wetland, woodland, ravine, valley or area of natural and scientific interest;
 - a significant corridor or shoreline of a lake, river or stream; and,
 - the site of a significant archaeological resource.

How to Use this By-Law

The following steps describe what a property owner should do to determine what can be done with a property.

1. Every property owner should first find the map, which in this by-law is called a schedule, that applies to their property, locate their property and determine what Zone their property is in. The maps for this by-law are found immediately following Section 8.0 of this by-law.
2. The property owner should then verify whether the lands are subject to an amendment to the Zoning By-law. Such an amendment may not be incorporated in the version of the by-law referenced by the property owner.
3. Reference should then be made to Section 3.0 - Permitted Uses to determine what uses are permitted in that Zone. All of the uses in the Permitted Uses table are also defined in Section 6.0 of the by-law.
4. Once the permitted use is known, reference should then be made to Section 4.0 - Zone Standards to determine what standards apply to any buildings or structures associated with the permitted use on the lot. The Zone Standards are also contained on tables and the majority of these standards are also defined in Section 6.0 of this by-law.
5. After determining what standards may apply to a permitted use on the property, reference should then be made to the General Provisions section of the by-law to determine what provisions in that section may apply to the property.

6. The drawings provided in an appendix to the by-law should then be referenced to assist the reader in interpreting the by-law. The appendices are solely for illustration purposes only and do not form part of the bylaw.
7. The property owner should also make himself aware that regulations of other government agencies may have an impact on the development of a property. These agencies include:
 - The County of Simcoe, who have regulations regarding the siting of buildings and structures, and driveways on lands that abut a County Road;
 - The Ministry of Transportation, who have regulations regarding the siting of buildings and structures and entrances on lands that abut or are near a Provincial Highway; and,
 - The Nottawasaga Valley Conservation Authority and Lake Simcoe Region Conservation Authority, who have regulations regarding the siting of buildings and structures in certain parts of the Township. [By-law 2013-179]

A by-law number appearing in square brackets denotes the by-law which amends the corresponding subsection, paragraph, table or clause.

It is the responsibility of the property owner to ensure that he has complete understanding of the requirements of the agencies listed above and the requirements of any other agency that may have an interest in the development of property.

An explanation of each of the sections of the by-law is found in the next section.

Description of Components of By-Law

Section 1.0 - Administration

This section of the by-law specifies:

- what lands are covered by the by-law; and,
- that every parcel of land in the area covered by the by-law is to conform and comply with the by-law.

Section 2.0 - Establishment of Zones

This section establishes the Zones that are to apply to the lands covered by the by-law. The section also describes how to determine the location of the Zone boundaries on the schedules.

Section 3.0 - Permitted Uses

This Section lists the uses that are permitted in each Zone. The effect of these Zones is to only permit certain uses in various parts of the municipality. Because of the nature of the Planning Act, zoning by-laws are prohibitive. That is, the only uses that are permitted are those that are specified in the by-law. If a use is not specifically mentioned as a

permitted use in a Zone, or if it is defined in Section 6.0 of the by-law and not listed as a permitted use, then it is not permitted.

Section 4.0 - Use Standards

This Section contains a number of regulations that control the placement, bulk and height of a building on a lot. Many of these regulations are described in the appendices that are attached to this by-law. Some of the regulations dealt with by the by-law are described below:

Minimum lot frontage -This regulation specifies what the minimum width of the lot must be on the street.

Minimum required front yard -This regulation specifies how far the main building on the lot must be set back from the front lot line. The front lot line is usually the lot line that separates the lot from the street. For example, if the minimum required front yard is 4.5 metres, the building must be set back a minimum of 4.5 metres from the front lot line. [By-law 2013-179]

Minimum required rear yard - This regulation specifies how far the main building on the lot must be set back from the rear lot line. The rear lot line is the lot line that is usually opposite and farthest from the front lot line. [By-law 2013-179]

Minimum required interior side yard - This regulation specifies how far the main building on the lot must be set back from the interior side lot line. The interior side lot line is usually the lot line that separates the lot from an abutting lot.

Minimum required exterior side lot yard - This regulation specifies how far the main building on the lot must be set back from the exterior side lot line. The exterior side lot line is the lot line that separates the lot from a street on a corner lot.

Section 5.0 - General Provisions

This section contains a number of regulations that apply to certain types of uses, buildings or structures in the Township of Oro-Medonte. For example, this section contains provisions dealing with the construction of decks in any Zone, provisions dealing with the minimum number of parking spaces required for a use and a section regulating where detached accessory buildings are permitted. The General Provisions also include regulations dealing with:

- the size of accessory buildings; accessory dwelling units;
- permitted encroachments of balconies, porches and eaves
- into required yards;
- home occupations; and, width of driveways.

Section 6.0 - Definitions

It is necessary to define words in a zoning by-law because it is a legal document. A by-law must be drafted so that it can be enforced in a court of law. All words in this by-law

that are *italicized* are defined in Section 6.0. In order for a law to be effective, it must be capable of being easily interpreted. Often the most common usage of a word is not exactly what is intended by a zoning by-law. Therefore, many common words are defined so that their meaning is perfectly clear.

Section 7.0 - Exceptions

This section contains regulations, which are specific to one property or a group of properties in the Township. For example, the minimum required front yard in a Zone may be 4.5 metres. This required front yard may be reduced to a lesser number if deemed appropriate and the mechanism to accomplish this reduction is by amending the By-law and excepting the property from the general standard. Exceptions are denoted on the schedules by a number following the (*) symbol.

Section 8.0 - Enactment

This section contains the signatures of the Mayor and the Clerk who signed the by-law when it was passed by Council in accordance with Section 34 of the Planning Act, R.S.O. 1990, c. P.1 3.

Contravention of the By-Law

Section 67 of the Planning Act describes what could happen if a person or corporation is convicted of a violation of this by-law.

Any person convicted of a violation of this by-law is liable, at the discretion of the convicting justice, on first conviction to a fine of not more than \$25,000.00 and on a subsequent conviction to a fine of not more than \$10,000.00 for each day or part thereof upon which the contravention has continued after the day on which the person was first convicted.

Any corporation convicted of a violation of this by-law is liable, at the discretion of the convicting justice, on first conviction to a fine of not more than \$50,000.00 and on a subsequent conviction to a fine of not more than \$525,000.00 for each day or part thereof upon which the contravention has continued after the day on which the corporation was first convicted.

Non-Conforming Uses

A non-conforming use is defined as a use that exists on a property but which is not permitted in the zone in which the property is located. Section 34(9) of the Planning Act states that no zoning by-law can prevent the use of any land, building or structure for any purpose prohibited by the by-law if such land was lawfully used on the day of the passing of the by-law, so long as it continues to be used for that purpose. However, expansions to a legal non-conforming use will require the approval of an amendment to the zoning by-law or the approval of the Committee of Adjustment before it can occur. Section 5.1 8 of this by-law deals with this issue.

Non Complying Buildings and Structures

A non-complying building or structure is a building or structure that does not comply with the yard, setback or other regulatory provisions in the by-law. For example, if a building was required to have a yard of 10.0 metres from a lot line by this by-law, but had a yard of 6.0 metres from the lot line on the effective date of the by-law, the building is then considered to be a legal non complying building.

Expansions to the building in the required yard that have the effect of increasing the floor area or volume of the building or in any other manner increases the extent to which the building does not comply with the provisions of this By-law is not permitted without first obtaining an amendment to the zoning by-law or the approval of the Committee of Adjustment. Section 5.1 6.1 of this by-law deals with this issue.

New setbacks from the average high water mark of Lake Simcoe and Bass Lake and the boundaries of the Environmental Protection Zone have been included in this By-law in order to implement the Official Plan. It is recognized that many existing buildings, structures and septic systems may not comply with these new setbacks. As a result, existing buildings, structures and septic systems that are located in this setback area will be permitted in this setback area. However, expansions to a building, structure or septic system that have the effect of reducing the setback will not be permitted without first obtaining an Amendment to the Zoning By-law or the approval of the Committee of Adjustment. Section 5.28 of this By-law deals with this issue. New buildings, structures and septic systems will be required to comply with the new setback requirements. [By-law 2013-179]

Effective Date of By-Law

Sections 34(21) and 34(30) of the Planning Act states that a by-law comes into effect on the date it is passed if no appeals are received or, if they are received, they are disposed of by the Ontario Municipal Board. However, if the Ontario Municipal Board repeats a portion of the By-law or amends a portion of the by-law, the amended portion comes into effect on the date of the Board's order. Other portions of the by-law that were not subject to an appeal would then be in effect on the date the by-law was passed.
