

HCC MASTER PLAN STUDY UPDATE

The Horseshoe Craighurst Corridor (HCC) Landowners Group Inc. (the “Landowners”) and the Township of Oro-Medonte initiated a Water, Wastewater and Transportation Master Plan Study in May 2015.

The Township considers a Master Plan an important document as it provides a road map for future development while maintaining the flexibility needed to respond to changing conditions. The HCC Master Plan Study will identify a long-term servicing plan for the future development area. Background information about the master plan study is available under the Municipal Services, Roads & Water section on the Township’s website, oro-medonte.ca/municipal-services/roads-water/engineering/horseshoe-craighurst-master-plan

To notify the public of the project, a notice was published in local newspapers and on the Township website. The notice referenced a public consultation process including an open house. **Please note the open house is pending until further notice due to matters that the Township is not involved with.** The timing of an open house is unique to each project and varies based on site specific assessments. There are no set regulations or legislated deadlines with respect to the timing for public consultation.

The Township is one of the many project stakeholders. As co-proponent of the study, the Township is making ongoing efforts to keep the project moving forward.

Once an open house is scheduled, the date and venue will be advertised in local newspapers and those on the project mailing list will be directly notified. The open house will present background information, servicing options, preliminary recommended servicing solutions, and next steps.
