

NOTICE OF ONLINE PUBLIC INFORMATION CENTRE
Georgian Communities – Village of Craighurst
Schedule ‘B’ Municipal Class Environmental Assessment

In 2019, a Water, Wastewater and Transportation Master Plan (WWTMP) was completed to identify a long-term municipal servicing plan for future development of the Craighurst and Horseshoe Valley Settlement Areas. The plan provided direction on the preferred solutions for implementation of water, wastewater and transportation infrastructure to accommodate future growth within the two settlement areas. The WWTMP identified three preferred solutions/projects relevant to the Craighurst Settlement Area that fall under the requirements of Schedule B projects of the Municipal Class Environmental Assessment (EA) process:

- Improvements to water supply for existing residents and additional capacity to support growth
- Construction of a new in-ground water storage and treatment facility
- Construction of a new Wastewater Treatment Plant in Craighurst

The WWTMP successfully completed Phases 1 and 2 of the Municipal Class EA process for these projects and detailed design and construction may proceed.

The approved Draft Plan for development of lands within the Craighurst Secondary Plan area, located at the northeast corner of Penetanguishene Road and Horseshoe Valley Road, includes a mix of residential types, park and open space area and future commercial and institutional uses. The Schedule B Municipal Class EA projects list above will be implemented as part of this new development.

ONLINE PUBLIC INFORMATION CENTRE

The purpose of this Online Public Information Centre (PIC) is to provide an overview of the draft plan approved development within the Village of Craighurst, including the conceptual design layout, and how the Schedule B Municipal Class EA projects will be implemented through detailed design and construction as part of this new development. **PIC materials, including a YouTube video, will be available for your review from April 22, 2021 until May 20, 2021 on the Township of Oro-Medonte website by visiting oro-medonte.ca.**

Please contact a member of the project team listed below if you have questions, comments or if you are unable to access the online PIC materials provided on the study website:
