NOTICE OF STUDY COMPLETION

Georgian Communities – Village of Craighurst

Schedule 'B' Municipal Class Environmental Assessment

A Water, Wastewater and Transportation Master Plan (WWTMP) was completed in December 2019 to identify a long-term servicing plan for future development of the Craighurst and Horseshoe Valley settlement areas, within Simcoe County. The WWTMP followed Approach 2 as outlined in the Municipal Class EA document (October 2000, as amended) Master Planning process, which is an approved process under the Ontario Environmental Assessment Act. Approach 2 is designed to complete Phases 1 and 2 of the Municipal Class Environmental Assessment (MCEA) process.

Three projects recommended from the WWTMP relevant to the Craighurst Settlement Area were identified:

- Improve water supply wells to provide additional capacity
- Construct a new in-ground water storage facility in the vicinity of the Craighurst well
- Construct a new Wastewater Treatment Plant with sub-surface discharge in Craighurst

The EA process requirements were satisfied through the 2019 WWTMP and no further work is required. Georgian Communities is moving forward with the completion of the detailed design and construction of these projects on behalf of the Township of Oro-Medonte.

A virtual Public Information Centre (PIC) was held from April 22, 2021 to May 20, 2021 to ensure transparency in accordance with the consultation provisions of the MCEA process. The WWTMP and PIC material is available at the Township of Oro-Medonte website (www.oro-medonte.ca).

If there are additional questions or comments about this project, please contact:
