

Issue Date: October 7, 2021

UPDATED: October 8, 2021 @ 16:25

Upon further investigation it has been determined that this notice applies to the following affected areas only: Snow Making Plant, Sewage Treatment Plant and the Heights Country Club. The Precautionary Boil Water Advisory is no longer required for all other areas of the distribution system.

NOTICE: Precautionary Boil Water Notice for Horseshoe Resort Well Supply

A sample result from the distribution system indicated the presence of pathogens in the drinking water. Corrective actions are being undertaken under guidance from the Ontario Ministry of Health.

Recommendations

The water should not be used for: drinking, preparing food, oral hygiene, washing/rinsing cutlery, dishes, glasses and cups, and bathing young children (who sometimes drink bathing water) making infant formula and juices, making ice. For these purposes, boiled water or bottled water should be used. The elderly, infants, and those with weakened immune systems may be at greater risk.

What should you do?

- Bring your water to a rapid boil for at least one minute (or you may use bottled water) and allow it to cool before using it to:
 - Drink
 - Gargle, spray or brush teeth, or rinse dentures
 - Wash fruit, vegetables, and other food; and
 - Make ice, juices, puddings, or other mixes
 - Baby food or formula should be prepared using only bottled water
- For bathing and washing:
 - Adults, teens, and older children can still use tap water for baths and showers.
 - Young children can be given sponge-baths instead of tub baths or showers
 - Do not swallow any tap water used for showers and baths
- Dishwashing:
 - Wash your dishes in a soapy solution, rinse and place them in a half-filled sink of water with two tablespoons of household bleach. Let dishes air dry. Households with a hot/sanitizing cycle may be used; they safely disinfect dishes.
- Laundry:
 - Do laundry as normal
- If you or someone in your family becomes ill, you should:
 - Immediately obtain medical advice for the elderly, infants, and those with weakened immune systems
 - For others, obtain medical advice if diarrhea persists for more than 48 hours

The Precautionary Boil Water Advisory will remain in effect until the repairs have been completed and microbiological testing meets regulatory standards. Once the conditions are met, the advisory will be lifted. At that time, users will be notified that the conditions that led to the issuance of the advisory have been successfully addressed, and that normal use of the water can resume.
