

# Drinking Water Quality Policy

The Township of Oro-Medonte is committed to manage the treatment and supply of clean, safe drinking water to all of its customers and commits to consistently meet all applicable legislative and regulatory requirements and customer needs.

To achieve these goals, the Township of Oro-Medonte commits to:

- Manage water quality from source to property line;
- Regular monitoring and testing of water to meet current regulatory requirements;
- Providing consistent and relevant training to operators to meet or exceed current training requirements;
- Invest capital monies to provide upgrades and rehabilitations to treatment and distribution systems;
- Continuing to establish and upgrade current practices, policies and Quality Management System;
- Provide Annual Reports, as per Ministry of the Environment requirements, to all customers upon request, in hard copy and on the Township website. These reports provide the customer with an annual overview of the Township Water Supply System.

The Township of Oro-Medonte has established and maintains a Drinking Water Quality Management System (QMS) that will be regularly reviewed, improved and upgraded by management and employees involved in the supply of drinking water. The Operational Plan for this Quality Management System will be readily available, in hard copy, at the Township Administration office or it can be accessed on the Township of Oro-Medonte website ([www.oro-medonte.ca](http://www.oro-medonte.ca)).

The Drinking Water Quality Management System has been implemented by the Township to effectively minimize and manage any potential risks to drinking water quality and safety.
