Forest Bathing Walk

"On Earth Day, we are invited to slow down, listen, and remember our place within the living world. Join us for a guided Forest Bathing walk in the Copeland Forest.

Our gentle, level loop will wind beneath a mixed canopy, with frequent pauses to engage all our senses. Through simple, guided invitations, we'll deepen our connection to the land, cultivating presence, gratitude, and a felt sense of relationship with the forest.

Earth Day is not just a celebration, but a remembering — of our interdependence with the natural world and our responsibility to care for it. This walk offers a meaningful way to honour the Earth: by listening, by being present, and by reconnecting with the land that sustains us"

Act Locally, Impact Globally

Environmental progress has always come from people who believed they could make a difference. Students, scientists, families, farmers, union members, business owners, and elected officials all have a role to play. When people take action, communities are built. When inspired communities speak up, leaders listen. When leaders act, policies shift and industries and corporations are held accountable. This is how real change happens. Your voice, your choices, and your actions are the spark that moves the world.

Earthday.org announces the global theme for Earth Day 2026: **Our Power, Our Planet**. The campaign calls on communities everywhere to stand up and speak out in support of clean air, clean water, clean energy, protected natural resources and a stable climate.

What Can I Do?

Making a difference starts with small, everyday actions. Here are some ways you can help protect our planet and support the **Our Power, Our Planet** theme:

- **Reduce, Reuse, Recycle:** Cut down on waste by recycling properly and choosing reusable items.
- **Conserve Energy:** Turn off lights when not in use, unplug electronics, and consider switching to energy-efficient appliances.
- **Choose Sustainable Transportation:** Walk, bike, or carpool whenever possible.
- **Plant Something:** Trees, flowers, or even a small garden help improve air quality and support local ecosystems.
- **Protect Water:** Fix leaks, avoid wasting water, and reduce pollutants by using eco-friendly products.
- **Shop Smart:** Buy local, choose products with minimal packaging, and support businesses that prioritize sustainability.
